

Scout: No-nonsense herd management software

Consider getting all of your cow records - identification, breeding, production and health records, in one place, in Scout.

Scout is hands down the easiest herd management program to learn. And, it is no nonsense software for those dairies whose time is valuable.

- Easy record keeping**

Simplify and enhance your herd's records by keeping all animal identification, production, reproduction and health records in one place and integrated with your management tasks. Cow records and work lists are easily accessible for other members of the family or farm team.

On test day automatically transfer that information to your Dairy One technician.

← Events are entered quickly and easily.

Enter date, treatment and other information about a cow that has been dried up at the end of her lactation. You will be prompted for both a remark and a dry treatment remark.

- Better, more timely decision making**

Because you are entering data on a regular basis, Scout can more accurately tell you what is happening on your dairy. You can make better cow decisions by having timely, accessible information. Production information is automatically retrieved from Dairy One after test day. For those dairies who do not use a DHI service, production information can be manually entered.

Events	Item 1	Item 2	Test Days		PrevLacts	Lactation	Picture				
BNAME	RUDY	PTOTM	28220	RPRO	BRED	MKDEV	-10				
PEN	0	ONBST	0	DUE	—	CAR	—				
Test Date	DIM	MILK	PCTF	PCTP	FCM	305ME	RELV	SCC	LGSCC	PEN	MUN
10/19/03	20	67	4.0	3.2	72	17040	72	3200	8.0	0	9
11/15/03	47	87	3.8	3.0	91	19630	83	460	5.2	0	11
12/30/03	92	73	3.5	3.0	73	18730	79	1715	7.1	0	0
1/29/04	122	66	3.5	3.3	66	18250	77	230	4.2	0	0
3/1/04	154	52	4.1	3.1	57	16960	72	174	3.8	0	0

Each cow record displays production information for each test day. Data can be downloaded automatically, or manually entered.

• **A more profitable business**

With access to better, more timely information, and the opportunity to make better decisions, you can improve profits on your dairy. One example of improved efficiency is the vet list. Running a reliable vet list with one keystroke provides a way to check cows quickly, easily, and with less chance of missing a cow that should be checked.

If you would like to learn more about Scout, or to order a free demonstration CD contact us at 1.800.344.2697, extension 3 or e-mail: dmr@dairyone.com. You can also try Scout with your own herd for three months as part of the regular Scout setup.

Following are a few tips before deciding to use herd management software. Software users are happiest when -

- the computer is near their cows.
- the people that work the computer are the same people who work with the cows.
- there is good animal identification.
- good cow records are respected and appreciated.
- there is sound, experienced support from professionals at Dairy One.
